

# **ASCENSION ISLAND GOVERNMENT**

## **PUBLIC NOTICE**

### **New Harbour Crane for Ascension Island**

Arguably our harbour crane is the most significant piece of equipment on the Island and it is getting close to the end of its useful life. It has already suffered breakdown and repair many times and the Ascension Island Government has been unable to replace it because of the uncertain situation surrounding public finances.

However, in the interests of ensuring efficiency and sustainability the FCO has stepped in with a grant of £1m which will enable the best crane for the job to be bought.

The provision of this grant will contribute to the restructuring of AIG's public finances and reduce the need for infrastructure capital provision. This should help to ensure a sustainable future for the island.
